

New TUCSON

We have a passion for progress.

Outstanding progressive design doesn't just happen; it's crafted from the drawing board to the road. Since its launch in 2004, the TUCSON has continued to evolve in design and build, to reach this refined fifth-generation model.

Adventure Awaits.

The new TUCSON is about adventures together, plans made and plans delivered. A choice of powerful, efficient engines and technology that supports you.

Advanced safety systems protect you beyond the bodywork, with sensors and cameras that alert you to danger. A fully connected in-car information system syncs with your smartphone.

New N Line.

The new sporting aesthetics of TUCSON N-Line comes equipped with body-coloured wheel arches, black detailing on the front grille and unique new look 19" N Line alloy wheels.

The exterior is complimented by the new design of the N Line interior that adorns red detailing on the faux suede and black leather upholstery, as well as the ability to personalise the interior with the choice of 64 ambient interior lighting colours.

Feature highlights.

With fine finishing and close attention to detail throughout, the new TUCSON delivers the perfect drive.

Infotainment system

The next generation TUCSON comes equipped with dual curved 12.3" digital screens that feature a more luxurious and refined user interface.

Integrated wireless charger

The automatic and hybrid powertrains adorn a wireless phone charger built into the centre armrest.

Finesse and flexibility

The 40:20:40 rear folding seat combination allows you to customise the rear space to suit every journey.

eCall

Should you be involved in an accident, your new TUCSON will automatically phone the emergency services via the eCall system.

Feature highlights.

Digital driver display

The 5th generation of TUCSON features a new look digital driver display.

Shift-by Wire

Shift-by Wire is an intuitive electronic drive mode changing system located next to the steering wheel that features a rotary-type dial. Available on automatic and hybrid powertrains only.

USB-C Connectivity

The USB-C charging ports allows you to select between screen pairing or high speed USB-C charging.

Dual Zone Climate Control

The touch sensitive climate controls also feature dual zone climate functionality, which allows the temperature to be set with the use of physical dials.
